1. Resta y representa con material base 10

The image shows four examples of subtraction problems using base 10 blocks and place value charts. Each example consists of a subtraction problem, a place value chart with blocks, and a blank chart for the student to work on.

Example 1: $413 - 28$. The place value chart shows 4 tens rods and 13 units cubes in the 'Unidades' column. A diagonal line is drawn through the 4 tens rods and 1 unit cube, indicating a regrouping of 1 ten rod into 10 units cubes. The 'Decenas' column has 3 tens rods, and the 'Unidades' column has 12 units cubes. The blank chart shows 3 tens rods and 12 units cubes.

Example 2: $36 - 19$. The place value chart shows 3 tens rods and 6 units cubes in the 'Unidades' column. A diagonal line is drawn through the 3 tens rods and 1 unit cube, indicating a regrouping of 1 ten rod into 10 units cubes. The 'Decenas' column has 2 tens rods, and the 'Unidades' column has 15 units cubes. The blank chart shows 2 tens rods and 15 units cubes.

Example 3: $65 - 37$. The place value chart shows 6 tens rods and 5 units cubes in the 'Unidades' column. A diagonal line is drawn through the 6 tens rods and 1 unit cube, indicating a regrouping of 1 ten rod into 10 units cubes. The 'Decenas' column has 5 tens rods, and the 'Unidades' column has 14 units cubes. The blank chart shows 5 tens rods and 14 units cubes.

Example 4: $22 - 16$. The place value chart shows 2 tens rods and 2 units cubes in the 'Unidades' column. A diagonal line is drawn through the 2 tens rods and 1 unit cube, indicating a regrouping of 1 ten rod into 10 units cubes. The 'Decenas' column has 1 ten rod, and the 'Unidades' column has 11 units cubes. The blank chart shows 1 ten rod and 11 units cubes.

Asignatura: Estudios Sociales.
